

PRA

KEEP WELLS, PIPELINES AND TANKS CLEAR OF WAX

arcata

www.arcatausa.com

WHAT IS PRA©?

- PRA© is a specialty product used to eliminate paraffin in wells, pipelines/flowlines and oil storage tanks.
- PRA© is an environmentally safe, highly confidential blend of natural emulsifiers and surfactants.
- PRA© is 100% biodegradable and zero Hazmat rated. It is non-toxic, non-flammable and contains no microbes, dispersants or detergents.

HOW DOES IT WORK?

- PRA© is a tension breaker that lowers the water/paraffin molecule surface tension. Our product dehydrates the paraffin wax formation, causing the paraffin to return to the oil phase.
- It keeps the re-entered oil/paraffin in its oil phase until it can be broken out during the normal refining process.

HOW CAN WE SAVE YOU MONEY?

Increase Productivity

Reduce the need for expensive and time-consuming pipeline/flowline and well shutdowns.

Recover More Oil

Users of PRA© report that after applying PRA© they have recovered up to 20% more oil per quarter.

Save Money

- Offset extra recovered oil against product costs. Our clients have found that after one treatment the product pays for itself.
- Reduces the need for expensive mechanical clean-ups.

HOW CAN WE IMPROVE YOUR PRODUCTIVITY?

Continuous Flow

- PRA© increases the overall flow of oil.
- PRA© has been proven to reduce the viscosity of heavy crude oil by up to 90%.

Reduce Stoppages

- The application of PRA© reduces the number of stoppages due to build-up and accumulation problems.
- 100% Effective even in difficult conditions. PRA© works in hot or cold water conditions.

WHERE CAN PRA© BE USED?

- Down-hole paraffin problem
- Petroleum and crude pipelines/flowlines
- Oil storage
